

SAKTHIVADIVEL GANESAN

Head of Product Design | AI-Native UX Leader | SaaS & Cloud Platforms

Product design leader (14+ yrs) building agentic, AI-powered experiences and leading senior design teams at scale.

+91 9945553867 · sakthi.vdl@gmail.com · LinkedIn · Portfolio · Detailed Wireframes

PROFESSIONAL PROFILE

Product Design leader with **14+ years** crafting **industry-leading, AI-focused user experiences** for SaaS and cloud platforms serving **4M+ users**. Track record of **building, leading, and growing teams of 15+ designers and engineers** with strong craft, systems thinking, and product instincts. Deep expertise translating **complex technical capabilities into intuitive, trustworthy experiences** — including **agentic and multi-turn AI workflows** built on MCP, LLM orchestration, and design-to-code automation. Has shipped **25+ products across multiple areas** (cloud backup, remote access, NAS/VM, mobile), bridging the gap between design and engineering and operating fluently from hands-on design to **executive-level design advocacy**.

STRATEGIC EXPERTISE

- Design Leadership:** Building & growing senior design teams, craft standards, mentoring, design vision
- AI-Native UX:** Agentic & multi-turn AI experiences, MCP protocols, AI-integrated prototyping, design-to-code
- UX Strategy:** Product vision, design systems (lead), information architecture, systems design, user research, A/B testing, WCAG accessibility
- Design Tools:** Figma (Locofy, Kombai, Anima), Adobe XD, Axure RP, Storybook, Jira
- Engineering:** React, JavaScript, Python (AI app & automation), HTML5/CSS3 (Tailwind/SASS), Electron
- Platform:** SaaS architecture, multi-OS (Windows/macOS/Linux), GitHub/GitLab, Agile/Scrum

PROFESSIONAL EXPERIENCE

Technical Lead – UI/UX & Architecture

IDrive Software India Pvt Ltd | Bangalore, India | 2012 – Present

- Design Leadership:** Built and led a cross-functional team of **15+ senior designers and engineers**, owning the end-to-end UX vision for a **portfolio of 25+ products across multiple areas** (cloud backup, remote access, NAS/VM, mobile) serving **4M users** on desktop (Windows/macOS/Linux), mobile, and web.
- AI-Native Experiences:** Defined what “great” looks like for **AI-powered workflows** — pioneered **agentic, multi-turn AI experiences** using MCP protocols, GitHub Copilot, and LLM orchestration, achieving 99.9% conversational-to-code accuracy and cutting design-to-engineering handoff by 30%.
- Technical Depth:** Translated complex backup and cloud-infrastructure capabilities into intuitive, trustworthy UI — reducing “Time-to-First-Backup” by **40%** and support tickets by **25%** through guided, wizard-driven flows.
- Systems & Craft:** Established the design system and an AI-assisted design-to-code pipeline, saving **15+ engineering hours per sprint** and raising craft standards across the team.
- Delivery & Quality:** Drove end-to-end product delivery from research to release — reducing production issues by **35%** and lifting team productivity by **20%** while sustaining high customer satisfaction.
- Executive Partnership:** Represented design in strategic conversations with Product, Engineering, and leadership, shaping product direction for enterprise cloud and backup environments.

Senior Web Designer / UI Developer — JBK InfoTech Pvt Ltd, Bangalore | 2011–2012

Led UI design and frontend development for enterprise-grade projects with responsive architecture and seamless handoffs.

Web Designer — Qwikinet Pvt Ltd, Chennai | 2010–2011

Built functional UI components for high-traffic web applications with a focus on usability and cross-browser compatibility.

FEATURED CASE STUDIES

- Agentic AI Research & Web Deployment (SSMTheory / Quantum):** Built AI-integrated web pages and a custom Python AI agent monitoring Zenodo — a **multi-turn, agentic workflow** with 100% automated notification and download.
- AI Design-to-Code Workflow:** Automated the design-to-code pipeline with MCP models and AI orchestration — saving **15+ engineering hours/sprint** and cutting handoff time 30% at 99.9% accuracy.
- Cloud Backup UX Redesign:** Simplified complex backup workflows into a guided UI — reducing support tickets by **25%** and improving onboarding clarity.
- Mobile Experience Optimization:** Redesigned mobile UX with an offline-first approach for field engineers — **4.2★ rating** and 500K+ downloads.

EDUCATION & CERTIFICATIONS

- Master of Computer Applications (MCA)** — Bharathidasan University
- Google UX Design Professional Certificate — User Experience (93%) & Design Process (91.87%)
- Google Project Management Certificate (Grade: 95%)
